

EXPLANATION OF CAP BENEFITS

ADVANCED TRAINING TRACKER

The Advanced Training Tracker (AdvTT) system allows you not only to track your employees' PEC training, but all training whether in-house or from an outside training company. AdvTT allows you to set expiration dates for any course and run reports on those expiration dates to make sure your employees are in compliance.

SAFETY MEETING ASSISTANCE

As a CAP subscriber, PEC will automatically email you monthly PDF documents that you can use as a tool in conducting periodic safety meetings with your employees. We provide presentations, test questions and sign-in sheets. The estimated value of each safety meeting is \$345.00.

DOCUMENT UPLOADS AND ARCHIVE

Gain the ability to upload crucial safety documents to our system for future reference. With your document uploads being fully integrated within our Standardized Safety Questionnaire (SSQ), PEC will walk you through the process of uploading the documentation your company needs to provide to the Operator. PEC will also archive these documents so that you don't have to.

ADVERTISING ASSISTANCE

Display your company logo, website link and a company description on your SSQ home page and on PEC's Current CAP Listing web page where Operators can search for Contractors.

CAP REPORT CARD

The CAP Report Card is designed to provide a "typical" SSQ score for your company, which will then enable you to determine how most of the Operators score their contracting companies.

INDUSTRY COMPARISON REPORT: TRIR

The Industry Comparison Report allows you to compare your company's TRIR as recorded in the SSQ against the actual TRIR data recorded from other companies with the same services as your company. The report is anonymous and will help you compare your TRIR with the competition!

SUMMARY REPORT

The Summary Report will allow you to review a snapshot report of your entire SSQ. Instead of looking at 25+ pages of the questionnaire, you can now look at two pages made up of the data with which the Operators are most concerned.

TRAIN-THE-TRAINER

CAP subscribers are eligible to be authorized as In-house PEC Instructors. As an Instructor, your employee is authorized to deliver PEC training for your company personnel. Visit the training section of pecpremier.com for more information on our Train-the-Trainer course offerings.

REPLACEMENT BADGES

As a CAP subscriber, you will receive a 67% discount on replacement PEC badges for your employees.

PARTICIPATION ON CDT

The Contractor Development Team (CDT) was created to provide you, the Contractor, with an equal opportunity to have input on decisions that may have a direct impact on your business. This benefit gives your company a platform to voice your suggestions and concerns to the Operators.

RETAIL PARTNERSHIPS

PEC/Premier has partnered with several companies around the nation to bring you the best value and service on the products you need to help your company achieve the ultimate goal of zero accidents. This program allows you to save money on what you need for your business while alleviating some of the burden that comes with operating in the oil and gas industry.
